WORK EXPERIENCE

Front-end Developer Saman salamat pajoh

11/2017 - 04/2023

Tehran

Saman Salamat Pajoh implements and maintains Iran Food and Drug Administration (IRFDA) systems. Here I worked on more than 10 national projects with millions of users.

Achievements/Tasks

- Designed and implemented a new front-end structure based on Vue 3 composition API, Quasar, and Vite for the next generation of systems to make them faster and lighter and improve their UI and UX, also enhanced the development and maintenance process significantly.
- Led the migration of several projects from AngularJS to Vue, making them about 19x lighter and extremely faster, with big improvements in UI and UX, including the Supply Chain Management System (Vue 3 & Quasar & Pinia), Adverse Drug Reaction (ADR) Systems (including Management system, Reporter system, and Reports system) (Vue 2 & Quasar & Vuex & PWA), and Identity Provider (IDP) System (Vue 2 & Vuetify).
- Trained developers and people interested in front-end development.
- Interviewed candidates for the front-end developer and test engineer positions.
- Implemented the new Labeling system (Vue 3 & Quasar & Pinia & Vite) and Covid-19 Effective Drugs Supply Management System (Vue 2 & Quasar).
- Worked as a front-end Developer on many AngularJS systems.
- Worked as an automation test engineer (Selenium, NUnit, Extent reports, Specflow,...) and QA test engineer on several projects.

Front-end developer (Web3 JS) Freelancer

11/2021 - Present

Achievements/Tasks

- Implemented Web3 NFT Minting Apps and Token Gate Solution for <https://www.minth.io> (Web3 JS & Moralis & Webflow).
- Implemented <https://ascendants-sample.web.app> NFT web app and <https://web3-sample-test.web.app> NFT minting test app (Web3 JS & Vue 3 & Quasar & Pinia).
- Provided consultation to a Romanian business on their issues, built their project structure (Vue 2 & Quasar & Vuesax & Vuex & PWA), and provided solutions to make their UI more intuitive.

Front-end Team Lead Eghtesaad-e bidaar brokerage

12/2019 - 03/2020

Tehran

For 4 months, at the same time with Saman Salamat Pajoh

Achievements/Tasks

- Implemented the registration system of the Eghtesaad-e Bidaar brokerage (Vue 2 & BootstarpVue & Vuex) and the "Sabad gardaan" website of the Eghtesaad-e Bidaar brokerage (Nuxt & BootstarpVue).
- Trained junior developers.
